

Clear Coats

Several clear coat types are on the market. We do not claim to be an expert in advising which clear coats should be used in a customer's application. We can only suggest to the customer which clear coats have been used and recommended by our other customers with good results.

Some types you can suggest are:

- Minwax® brand (at any Lowes or Home Depot)
- Tree House Studio Clear Acrylic Gloss (Hobby Lobby stores)
- Krylon® brands (krylon.com)
- Design Master Clear Finishes (dmcolor.com)
- Testors - 1814T Spray High Gloss Clear 3 oz (activepowersports.com)
- Frogjuice (signwarehouse.com)
- ColorTone Guitar Lacquer (stewmac.com)
- Ecos Woodshield Varnish (www.ecospaints.net)
- MasterClear Supreme (www.thepaintstore.com)
- Auto Body Clear (www.zoro.com)
- Eastwood Clear Coats (www.eastwood.com)

Clear coats from any of these suppliers can be found in various finishes, including: dull or matte, semi-gloss and gloss or hi-gloss.

When to use a clear coat:

Clear coats are used after a Transfer is applied to a customer's product and when the product is going to be handled a lot or there is a high volume order of transfers. This typically means the customer is using our transfers on a product which will be sold on the market. The life of a Transfer will also be increased as it will provide extra protection and durability to the Transfer when a clear coat is applied.
